

Ek small but powerful practice:

Student Report System

Class: Student

Attributes

private int rollNumber;

private String name;

private int marks;

Methods

setMarks(int marks)

getMarks()

displayDetails()

isPass()

Rule:

marks < 0 or > 100 invalid

Class: School

Attributes

Student[] students = new Student[50];

int count;

Methods

addStudent(Student student)

showAllStudents()

findStudent(int rollNumber)

showPassedStudents()

Isme Tumhe Firse Milega

- ✓ private fields
- ✓ getter usage
- ✓ controlled modification (setMarks)
- ✓ object array
- ✓ object interaction
- ✓ class responsibility separation

Important

Direct:

```
student.marks = -50;
```

allow mat karna.

Sirf:

```
setMarks()
```

se modify karna.

Tab encapsulation aur clear feel hoga.
