
✅ **Phase 3: Core Foundation (same rahega)**

11. Object Class

- toString()
- equals()
- hashCode() ★

12. Wrapper Classes

- Autoboxing / Unboxing
 - Integer, Double, etc.
-

🚀 **Phase 4: Collections (yaha main change hai)**

13. Collections Framework

👉 Isko aise padhe (IMPORTANT ORDER):

1. **Generics** ★ (sabse pehle)

- <T> concept
 - Type safety
-

2. **List**

- ArrayList
 - LinkedList
-

3. **Set**

- HashSet
-

4. **Map** ★

- HashMap
-

5. **Iterator**

6. **Comparable vs Comparator** ★

7. **Lambda** ★ (yahi pe add hoga)

👉 Sirf Comparator ke baad

⚙️ Phase 5: Real World Basics (almost same)

14. Exception Handling

15. **Enum** ★ (yaha shift kiya)

👉 Easy + real use

16. Packages (basic)

17. File Handling (basic)

🧠 Phase 6: Light Advanced

18. Multithreading (basic understanding)

- Thread kya hai
 - Runnable vs Thread
 - Lifecycle
-

19. Inner Classes (basic idea)

🎯 FINAL CLEAN VERSION (TERA FORMAT)

Phase 3:

Object Class

Wrapper Classes

Phase 4:

Collections Framework

- Generics
- List (ArrayList, LinkedList)

- Set (HashSet)
- Map (HashMap)
- Iterator
- Comparable vs Comparator
- Lambda

Phase 5:

Exception Handling

Enum

Packages

File Handling

Phase 6:

Multithreading (basic)

Inner Classes (basic)
